

Reffering Sortiment.ts too the Configurator by giving it the
same Namespace and declaring it with export

Interface Trees {

treetype: "string" ;
height: number ;
width: number ;
price: number ;
expressdelivery: boolean;

}

Objects can be created and
deleted by her

Interface Lightning {

Name: "string" ;
length: number ;
color: "string" ;
price: number ;
automaticchangeoflight: boolean;

}

Objects can be created and
deleted by her

Interface Decorations {

Name: "string" ;
color: "string" ;
price: number ;
expressdelivery: boolean;

}

Objects can be created and
deleted by her
